MODULE 09

90-day plan

Everything from modules 01 to 08, turned into week-by-week actions with three checkpoints.

Duration	Daily time	Checkpoints	Prerequisite
90 days (13 weeks)	20–30 min + 3 workouts / week	Day 30, 60, 90	Modules 01–08 read

BY THE END OF THIS MODULE, YOU'LL BE ABLE TO

Know exactly what to do each week, without having to think about it.

Add one change at a time, so you always know what's working.

Run three checkpoints that tell you whether to keep going or adjust.

Plan what comes after day 90.

9.1 How the plan works

The plan has **four phases**. Each one adds a layer only once the previous layer has become a habit. That's deliberate: trying to change everything in week one is the most common reason people quit by week three.

Phase	Days	Focus
1. Foundations	1 – 14	Baseline photos, core skin routine, sleep schedule, start training, quick style wins.
2. Setup	15 – 30	Introduce one skin active, set nutrition targets, posture routine, first exposure steps.
3. Progression	31 – 60	Progressive overload, wardrobe upgrades, voice and conversation practice.
4. Refinement	61 – 90	Review, adjust what isn't working, lock in habits for the long term.

9.2 Daily non-negotiables

From day 1, these happen every day. Everything else in the plan builds on top of them.

When	Action	Time	Module
Morning	Gentle cleanse, moisturizer, SPF 30+	3 min	02
Morning	Daylight within an hour of waking	5–10 min	03
All day	Protein at every meal, water to thirst, step count	—	04
All day	Light tongue posture, posture check at doorways	—	03
Evening	Cleanse, active (from week 3), moisturizer	3 min	02
Evening	Brush 2 min, clean between teeth	4 min	03
Evening	Phone away, fixed bedtime	—	03
Evening	Log the day: routine done? trained? sleep hours?	1 min	01

9.3 Week by week

Week	Skin (02, 06)	Body (03, 04)	Style & grooming (05)	Presence (07)
1	Identify skin type. Buy cleanser, moisturizer, SPF. Start core routine.	Day-1 photos and measurements. Fixed wake-up time. Start logging food (or habits if under 18).	Haircut with reference photos. Sort wardrobe: keep what fits.	Mute rating and comparison accounts.
2	Core routine only. Medicated shampoo if dandruff.	First 3 workouts: learn the lifts light. 7,000 steps/day.	Pick a styling product, practice daily. Decide beard or shave.	Build your exposure ladder.
3	Patch test your active. Start it 2 nights a week.	Set calorie and protein targets from your log.	Beard lines (neck and cheek) or shaving routine.	Ladder step 1, three times.
4	Active 2 nights/week. Watch for irritation.	Add the 8-min posture routine. Steps to 8,000.	List the first 3 wardrobe pieces to buy.	Record first 60-second voice clip.
5	Active every other night if tolerated.	Double progression: add reps each session.	Buy the first 3 pieces. Tailor if needed.	Ladder step 2.
6	Hold. Take hairline photos (front, temples, crown).	Weekly weigh-in average. Adjust calories if needed.	Details: brows, nails, nose hair, fragrance.	Eye contact practice in every purchase.
7	Active nightly if tolerated, else stay every other night.	Steps to 9,000. Check sleep average ≥ 7 h (8 h if under 18).	Second haircut. Same barber, refine.	Ladder step 3. Voice: work on one habit.
8	Hold. Don't add anything new.	First weight increases on most lifts.	Add next 2–3 wardrobe pieces.	Join one group conversation or activity.
9	Hold.	Review lift log: progressing? If not, check sleep and protein.	Shoes: clean, one good pair.	Ladder step 4.
10	Hold. Consider a second active only if needed.	Steps to 10,000 if realistic.	Third haircut.	Second voice clip, compare with week 4.
11	Hold.	Continue. Deload week if you feel run down (half the sets).	Final wardrobe gaps.	Ladder step 5.
12	Week-12 skin photos: same conditions as day 1.	Full photo set and measurements.	Full outfit photos.	Ladder step 6.
13	Day-90 review (9.4).	Day-90 review (9.4).	Day-90 review (9.4).	Day-90 review (9.4).

> IF YOU'RE UNDER 18
>
> Skip calorie targets. In the body column, "set calorie targets" becomes: regular meals, protein at each, fruit and vegetables daily, fewer sugary drinks. Everything else in the plan applies as written.

9.4 The three checkpoints

Day 30: is the foundation solid?

Check	Good sign	If not
Routine consistency (from your log)	Core routine done 6+ days a week	Simplify. Fewer products, set a fixed time. Consistency is the goal of phase 1–2.
Skin reaction to the active	No burning, manageable dryness	Drop to 2 nights a week or stop for a week (module 02).
Training	12 sessions done, weights going up	Schedule workouts like appointments. Shorter sessions are fine.
Sleep	Average ≥ 7 h (≥ 8 h under 18)	Fix wake-up time and caffeine cutoff first.

Day 60: is it moving?

Check	Good sign	If not
Body weight average	Down about 3–6% of starting weight if cutting	Check logging accuracy, then adjust 100–200 calories (module 04).
Waist	Down, or stable while weight is stable (recomposition)	Same as above.
Strength	Most lifts clearly heavier than in week 2	Check sleep, protein, effort level (1–3 reps from failure).
Photos vs day 1	Visible difference in at least one area	Remember timelines (module 01). Skin often needs until week 12.

Day 90: review and decide

1. **Put day 1 and day 90 photos side by side.** Front, three-quarter, profile, body. Same conditions.
2. **For each area, write one line**: improved, unchanged, or worse.
3. **Improved:** keep doing exactly that. It's working.
4. **Unchanged after 90 days of consistent effort:** this is the point to see a professional for that area (dermatologist for skin, doctor for hair, registered dietitian for nutrition, trainer for training form).
5. **Pick one new focus** for the next 90 days. Don't restart everything.

9.5 Troubleshooting

Problem	Fix
"I missed three days."	Normal. Restart the next day. Never miss twice in a row is a better rule than never miss.
"I'm not seeing any change."	Check against the timelines in module 01. Compare photos, not mirrors. Most changes show on monthly photos before the mirror.
"My skin got worse."	Purging (2–6 weeks, usual spots) or irritation (burning, unusual spots)? Module 02, 2.5.
"I'm always hungry."	More protein, more vegetables, more water. If still hungry, the deficit may be too big.
"I have no time."	Minimum version: core skin routine (6 min), 2 workouts of 40 min, steps on the phone. Keep the habit alive.
"I'm thinking about my looks all day."	Stop and read module 01, section 1.8. That's the moment to talk to someone.

9.6 Weekly tracker

Print one per week, or copy it into a notes app. Tick each box. Aim for 6 out of 7 on the daily lines.

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
AM skin routine + SPF							
PM skin routine							
Teeth (brush + between)							
Protein target hit							
Steps target hit							
Training session							
Posture routine							
Sleep hours							
Exposure / presence task							

Weekly review (5 minutes, Sunday)

1. What did I do consistently this week?
2. What slipped, and why?
3. What's the one thing I'll do better next week?

4. What's this week's step in the plan (9.3)?

9.7 After day 90

Day 90 isn't the finish line. It's the point where these stop being a "program" and become how you live. From here:

- **Keep the daily non-negotiables.** They're maintenance, and they're why the results last.
- **Rotate focus every 90 days**: one area gets extra attention, the rest stay on maintenance.
- **Photos every month, review every 90 days.** Same protocol as module 01.
- **Raise the bar on presence.** Confidence keeps compounding long after skin and style stabilize.

9.8 Your day-1 checklist

- ☐ I've read modules 01 to 08.
- ☐ I've taken my day-1 photos and measurements.
- ☐ I've bought or have the core skin products.
- ☐ I've set my fixed wake-up time.
- ☐ I've scheduled my 3 training days for week 1.
- ☐ I've booked my haircut.
- ☐ I've set calendar reminders for day 30, 60 and 90.
- ☐ I've printed or copied the weekly tracker.
